

THE OPERA HOUSE OF COPENHAGEN

THE OPERA HOUSE OF COPENHAGEN, COPENHAGEN, DENMARK

Building on the exquisite Bornebusch chandelier, [Bornebusch Tegnestue](#) and Okholm Lighting have created an elegant variant that provides linear illumination for the Opera's VIP room.

A multitude of light sources, arranged in a sophisticated "sporadic" pattern, infuses the clean-lined interior with a warm, luxurious atmosphere. Exclusivity is further underscored by the choice of polished brass, whose timeless glow, paired with warm-toned lamps, evokes a sense of classic elegance and calm. This meticulously considered design introduces a subtle yet luxurious presence, transforming the VIP room into an immersive experience of light and materiality in perfect balance.
