

TRINITATIS WALL

TRINITATIS WALL

The TRINITATIS wall lamp is a simple and decoratively designed fixture by [architects Inger & Johs. Exner](#). The glare shield and lower reflector ring create a beautiful and comfortable light that is also highly decorative, whether installed individually or in repetitive arrangements.

Additionally, the lamp softly illuminates the mounting surface, creating a striking decorative effect, for example, in a corridor setting. The lamp has a projection of 23 cm.

The shade construction ensures both glare-free and decorative illumination. Its minimalist design allows for a wide range of applications.

TRINITATIS WALL is also available as a pendant version. See PENDANTS.
