

WEGNER POST TOP

WEGNER POST TOP

In collaboration with Hans J. Wegner's Tegnestue, Okholm Lighting has chosen to resume production of the renowned Wegner Post Top, originally designed in 1976 by architect and furniture designer Hans J. Wegner together with architect Marianne Wegner.

With the Wegner Post Top, father and daughter won the design competition for lighting fixtures intended for urban districts with valuable historic architecture.

Thanks to its thoughtful design, the Wegner Post Top has illuminated many streets, alleys, and squares in Danish and international cityscapes. A defining characteristic is its angled top, which provides an asymmetrical light distribution. The shielding of the light source ensures glare-free illumination.

Product: WEGNER POST TOP

Material & finish: Sandblasted aluminum. Top: Cast aluminum – underside white lacquered. Enclosure: Vacuum-formed clear polycarbonate. Fixture frame: Cast aluminum. Optics: Vacuum-formed opal acrylic.

Dimension: Height 1: 670 mm. Height2: 450

Light sources: Max 200 W. E27 porcelain socket. 230 V. 3-meter supply cable (2x0.75 mm²).

Lighting technology: Asymmetrical light distribution

Suspension: For mounting on Ø60 mm top. Available with wall bracket. Weight: max. 18.5 kg.

Safety classifications: II

Ingress protection: IP23

Approval: CE

Design: Architect Hans J. Wegner and architect Marianne Wegner.
