

SORØ MAST

SORØ MAST

As part of an upgrade to the outdoor lighting around the historic buildings, [ERIK architects](#), inspired by Karsten Rønnovs Tegnestue's luminaires, designed a mast luminaire along with [two types of wall-mounted fixtures](#). In addition to illuminating previously dark areas—enhancing safety for residents, teachers, and students—the lighting also highlights the architectural qualities of the historic buildings. The luminaires feature a copper finish, which blends beautifully into the historic surroundings.

Material & finish: Copper

Dimension: Top: 60 × 60 cm

Light sources: 20W LED

Safety classifications: I

Ingress protection: IP23

Approval: CE

Design: Erik Møller architects

Latest update: 28/02-2025
