

SORØ ACADEMY OUTDOOR

SORØ ACADEMY, SORØ, DENMARK

To create a safer and more secure atmosphere in the areas between the buildings at Sorø Academy, [ERIK Architects](#) (formerly Erik Møller Architects) have designed two types of wall lamps, inspired by the area's existing lamp posts, originally designed by Karsten Rønnow's Studio. These have been installed on the corners of the main building as well as on the church façade facing Fratergården.

This solution achieves two effects: in addition to illuminating the historic building façades, the wall lamps also provide light to previously dark and somewhat uninviting areas. The lamps are designed in a historical style and crafted from materials that blend seamlessly and harmoniously into the historic surroundings.

Produkt: Sorø Academy Wall Lamp Sorø Academy Lantern

Material & finish: Wrought iron frame, black lacquered. Copper lantern housing.

Dimension: Lantern housing: H: 110 cm, Roof: 60x60 cm.

Light sources: E27, 60W / 230 V.

Lysteknik: 360° light distribution, clear light source, clear glass

Suspension: Wall arm or lamp post

Safety classifications: I

Ingress protection: IP23

Approval: CE

Remark: Client: Sorø Academy

Design: ERIK architects

Latest update: 28/02-2025
