

## **ABILDGAARD CHURCH, FREDERIKSHAVN, DENMARK**

For quite some time, Abildgård Church sought to improve the lighting conditions in its nave. This aspiration was realized in early summer 2021 when Okholm Lighting delivered a striking new lighting scheme. A “starry canopy” now spans the nave, creating a gentle, diffused illumination throughout the space.

The design features 285 pendant fixtures fitted with highly energy-efficient LED bulbs. According to church representatives, the new lighting significantly enhances visibility when, for instance, reading text from hymnals. The soft glow reduces eye strain and creates a welcoming atmosphere.

Moreover, Okholm Lighting equipped Abildgård Church with adjustable light levels, allowing them to adapt the brightness to different seasons and moods. Recessed spotlights behind the ceiling beams can be controlled individually via iPad, offering even greater flexibility.

The goal of providing an architectural lift to the worship space has been successfully achieved, and the luminous ceiling complements the church's existing interior design solutions.

**Produkt:** CEILING LIGHTING CONCEPT - SCAN PENDANTS

**Material & finish:** Lacquered brass – polished or matte-brushed. Aluminum – polished, matte-brushed, or white-lacquered (RAL 9010).

**Dimension:** Ø150 mm, 2-meter white plastic cord with a white 3-F pendant adapter.

**Light sources:** Socket/Base: E14. Wattage: Max 60 W. Voltage: 230 V.

**Suspension:** Wire

**Safety classifications:** II

**Ingress protection:** IP20

**Approval:** CE

**Design:** Robert Okholm

**Latest update:** 27/03-2025
