

HELLEBÆK WALL

The Hellebæk wall lamp, designed by [Finn Strabo](#), embodies a beautiful minimalist design. A ring chandelier has been transformed into an elegant wall-mounted luminaire. The simple yet highly sophisticated shape of the ring ensures that the fixture seamlessly integrates into its surroundings, making it incredibly versatile in its application.

The fixture is available with one or two light sources, allowing it to function as an uplight, downlight, or both. The light effect is pleasant and discreet. With its elegant design and exceptional quality, this wall lamp speaks for itself.
