

## FAKKEL POLE M450 COPPER

The FAKKEL POLE M450 COPPER is a simple yet atmospheric fixture that emits a pure, unshielded light. The light source gives the spherical enclosure a beautiful, halo-like glow. The luminaire is both minimalistic, timeless, and classic. It is available in different colors, materials, and two sizes, along with a FAKKEL WALL COPPER version, allowing for cohesive lighting solutions up to buildings and their immediate surroundings. The copper version adds an extra level of exclusivity to the installation.

The luminaire provides a radially symmetric light distribution, creating a warm and inviting atmosphere, particularly in areas with vegetation, trees, and shrubs. It is well suited for parks, cemeteries, and forecourts of corporate headquarters and hotels.

**Produkt:** FAKKEL POST TOP M300/M450

**Material & finish:** Cast aluminum, powder-coated anthracite gray (C6), black (RAL 9005), or aluminum gray texture (E3).

**Dimension:** Globe/Fixture Head: Ø45 cm, Base: Ø15 cm Light Point Height: 300 cm

**Light sources:** Max. 200W (M450). 230V.
