

FALSLED KRO

FALSLED KRO, FALSLED, DANMARK.

[Falsled Kro](#) is more than just an iconic Danish dining destination—it is a place where history and gastronomy merge into a holistic experience dating back to 1744.

In the late 1960s, the inn was revitalized by the visionary couple Lene and Sven Grønlykke, who succeeded in creating a destination that attracts food lovers from around the world. As part of the exclusive atmosphere of the inn, Okholm Lighting has developed a spectacular lighting concept that enhances the spatial experience.

The impressive ring chandelier, with a diameter of 4 meters, consists of two floating circles and 12 transverse arms, each featuring small, elegant “trumpets.” Hanging from this majestic structure are 48 luminous pendants—the iconic [SCAN pendant](#), featuring a gracefully curved shade that delivers a soft, atmospheric light.

Each element has been meticulously crafted in a refined combination of brushed stainless steel and high-polished brass, adding timeless elegance and warmth to the space, reinforcing the unique ambiance that Falsled Kro is renowned for.

Product: Custom designed Ring chandelier w/Scan Pendant

Material & finish: Polished brass

Dimension: Ø400cm

Light sources: 48 crown-shaped incandescent bulbs. Wattage: Max 60W, 230V Clear, bright crown-shaped incandescent bulb. 2700K

Lighting technology: Clear, bright crown-shaped incandescent bulb. 2700K

Suspension: Aircraft cable

Safety classifications: I

Ingress protection: IP20

Approval: CE

Design: Robert Okholm

Latest update: 15/06-2025
