

BT1041 CALOT PENDANT

The BT1041 Calot Pendant, with its softly rounded shade, was designed by Danish architects Claus Bonderup and Torsten Thorup. The design is part of a geometric series of three elegant and simple lamps created by the duo in the late 1960s.

All three lamps in the series feature a mirrored-top bulb, visible beneath the shade, creating a dynamic interplay of light and shadow.

With the BT1041 Calot Pendant, a beloved classic is reintroduced — now available not only in the original powder-coated steel in black and white, but also in brushed brass.
