

EK61 OPAL PENDANT

The EK61 Opal Pendant, designed in 1961 but never previously produced, is now being launched in glass and wood. This elegant and understated pendant, created by Esben Klint — son of the renowned Danish designer Kaare Klint — was originally intended to be made in pleated plastic. However, the complexity of the design made production unfeasible at the time, and the lamp remained in the family archives — until now.

The modern version features a pleated, ellipsoidal form made from mouth-blown opal glass.

Its distinctive oak details, reminiscent of traditional Chinese lanterns, are carefully turned and hand-finished to create a timeless expression.

EK61 is available in three sizes and emits a soft, indirect light thanks to the considered combination of classic materials.
