

MT221 TULIP PENDANT

The MT221 Tulip Pendant was designed by Marianne Tuxen in 2022 in connection with the restoration of the Pompeii Room at the Carlsberg Academy in Copenhagen. The lamp combines classical elegance with modern aesthetics and reflects a high level of craftsmanship.

The shade, whose shape references the petals of a tulip, is made from three layers of mouth-blown, glossy white opal glass, casting a soft, glare-free light into its surroundings. The solid brass suspension merges seamlessly with the glass shade, forming a perfectly organic unity.

The MT221 Tulip Pendant is available in two sizes: Ø170 and Ø360.
