

MO300 WALL LAMP

The MO300 Wall Lamp is a practical and functional lighting solution. The shade can be freely adjusted in multiple positions, making it easy to optimise the lighting. The lamp is well-suited for living rooms as well as bedrooms or children's rooms, thanks to the continuously adjustable shade. The light source is well-shielded, effectively preventing glare and ensuring visual comfort.

Danish designer Mads Odgård has chosen to focus on two simple and recognisable forms: the hemisphere and the cylinder — shapes with a clear, logical connection to natural light.
