

ARMILLA 50 CHANDELIER

### ARMILLA 50 CHANDELIER

Okholm Lighting A/S and architect Erik Lassen have made the ARMILLA chandelier in collaboration. The ARMILLA chandelier has the shape of a light globe. It has 36 light sources in total. The well thought out construction ensures that the interaction of the light sources is optimum. This means that the functionality and the light are perfect. ARMILLA is much more than a simple light source. It is very aesthetic, and the design is amazing. The stylish design and the high elegance of ARMILLA mean that ARMILLA looks decorative in every room.

Architect Erik Lassen has been inspired by the Armillasphere in the development of the globe. The result speaks for itself.
