

## DYBBØL CEILING WITH ADJUSTABLE JOINT

## DYBBØL CEILING WITH ADJUSTABLE JOINT

The DYBBØL CEILING fixture is a discreet and well-designed ceiling luminaire that, with its replaceable GU10 light sources, can be used to create optimal lighting arrangements in all types of spaces. Its minimalist design blends seamlessly into any architectural setting.

The DYBBØL CEILING with adjustable joint is a flexible fixture that allows light distribution to be individually adjusted, either to highlight architectural details or to create dynamic lighting effects.

The light sources are available with various beam angles, color temperatures, CRI options, and dimming capabilities, allowing for the optimization of lighting quality.
