

A.G. LECTERN LAMP

A.G. LECTERN LAMP

Elegant and discreet LED lectern lamp with multiple applications. The lectern lamp is available in two models – one for mounting on the lectern surface and one mounted on a solid oak base. It is commonly used on pulpits and altar tables, but can also serve as a music stand lamp for choir lofts or as a podium lamp for speakers.

The surface-mounted model comes with an external driver/power supply, while the oak base model has the driver integrated into the wooden base.

Both models can be supplied for battery operation (external battery/power bank) for an additional cost.
