

SUPREME COURT - LECTERN LAMPS WITH MICROPHONES

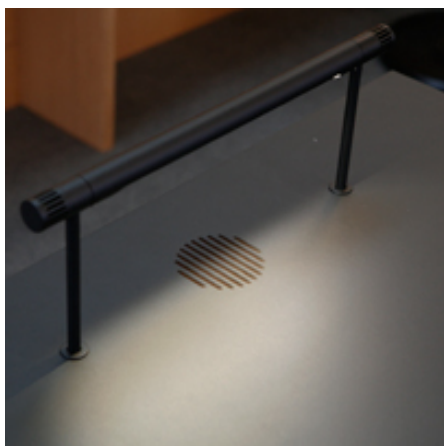

SUPREME COURT - LECTERN LAMPS WITH MICROPHONES

The Danish Supreme Court was built between 1803 and 1826, designed by C.F. Hansen, and was listed as a historic building in 1918.

The Second Division of the Supreme Court has undergone a complete renovation, led by [ERIK Arkitekter](#). Their vision was to create a space that reflects both classical and modern elegance, while maintaining a dignified atmosphere in line with the room's function. At the same time, it had to be functional, contemporary, and timeless.

A custom-designed lectern lamp was developed, featuring LED lighting and integrated microphones. The lectern lamps were delivered in chrome for the council desks and in black for the lawyers' tables.

Produkt: SUPREME COURT - LECTERN LAMPS WITH MICROPHONES

Material & finish: Matt steel or black lacquered steel

Dimension: ø2,5 cm. Length: 41,5 cm. Height: 14 cm on 2 sticks ø10.
