

FAKKEL W300 COPPER WALL

FAKKEL W300 COPPER WALL

The FAKKEL W300 COPPER WALL is a simple yet atmospheric wall-mounted luminaire, emitting a pure, glare-free light.

The light source creates a beautiful halo-like glow within the spherical enclosure. The luminaire is minimalistic, timeless, and classic. The copper wall fixture has a distinctive character, starting with its golden copper surface, which gracefully ages over time, eventually developing a beautiful patina. With its classic and timeless design, the FAKKEL series is an excellent choice, seamlessly integrating into both modern and historical environments.

The luminaire provides a radially symmetric light distribution, creating an elegant and refined illumination for any entrance area.

Material & finish: Copper.

Dimension: Bowl: ø300/100mm. Height: 57.5 cm

Light sources: Socket: E27, max. 100 W, 230 V.

Lysteknik: The luminaire provides an unshielded, radially symmetric light emission from the light source. The clear enclosure allows the light source's characteristics to be fully expressed. When illuminated, the circumference of the glass globe is decoratively accentuated.

Suspension: Directly on the wall. Connection: 2x2.5 terminal block + grounding terminal. Concealed or surface-mounted installation.

Safety classifications: I.

Ingress protection: IP23.

Approval: CE-marking.

Design: Brüel, Bornebusch, Selchau

Latest update: 12/02-2025
